The Writings of Joan Robinson

Maria Cristina Marcuzzo

This is the sixth version of the bibliography of the writings of Joan Robinson that I have produced so far.

The first was published in Studi Economici (no. 16, 1982), as the result of work I had started a few years before, following correspondence I had with Joan Robinson in 1974 requesting her to provide me with information about the list of her published writings.

The second was prepared when the Joan Robinson papers were brought to King's College, after her death, and I had a chance to look at them before they were catalogued. It appeared as 'Materiali di Discussione' (no. 1, Dipartimento di Economia Politica, Modena, 1985).

The third is contained in J. Rima (ed.), The Joan Robinson Legacy (New York: M.E. Sharpe, 1991) and benefited from the inspection of the catalogue of Joan Robinson papers prepared by the then King's College Modern Archivist, Mr M. Hall.

The fourth is published as an Appendix to Joan Robinson, Occupazione, distribuzione e crescita, ed. M.C. Marcuzzo (Bologna: Il Mulino, 1991) and benefited from the inspection of the R.F. Kahn papers, with the help of the former King's College Modern Archivist, Ms J. Cox.

The fifth version includes 65 items more than the third version and 13 items more than the fourth version, which, however, is not available in English. It is published in M.C. Marcuzzo, L. Pasinetti and A. Roncaglia (eds), The Economics of Joan Robinson (London: Routledge, 1996).

In the present version some inaccuracies and misprints of previous versions have been corrected.

Notation

Each publication listed in this bibliography has been assigned a number in brackets at the beginning of each entry that corresponds to the chronological order of publication. Where there is more than one edition of the same text, subsequent editions are noted in parentheses at the end of the listing for the first edition. Modifications that appear in later editions are noted separately under the year in which such changes were introduced. Essays that appear in different collections are listed by the number assigned to them for their first appearance in this bibliography. Account has not been taken of all the anthologies, essay collections and the like in which a particular article may have been republished, except for any edited by Joan Robinson herself. This suits the purpose of the present work, which is to date Joan Robinson's works and establish their order and sequence, rather than to provide a complete inventory of where her various writings may be found. If an article or essay appears in one or more of Robinson's own collections, the corresponding abbreviation appears in brackets and the year of the article's first publication appears in parentheses. Variations in titles among different sources, indications regarding modifications and other explanatory details are given in the notes.
